31.07.1994

Citizenship:

Spanish

Address:

Rüterstraße 73 – 22041 (Hamburg)

Spoken Languages:

English, Spanish, Catalan, Italian (A1), German (A2)

Volunteerings:

[AACF \(non-profit organization for hospitalized children\)](#)
[Spanish Disney's Legion 501st](#)

José Pascual

Senior Software Engineer

Experience

Senior Software Engineer

WALBING MARKETPLACE GMBH

Designing, development and thorough testing of B2B fin-tech Java software. Part of an international team in charge of building one of the world's first embedded financial services, track-and-pay and the new and greatly successful automated Credit Insurance system for invoice and debt auctions. Safe and scalable built-from-scratch financial applications used and funded by some of the most important insurance companies and debt collectors worldwide. With a tech stack including VUEjs, Amazon Web Services on the Java side, and of Python, PyTorch and TensorFlow on the AI section for automated invoice recognition and fraud detection services.

Junior Backend Developer

STATISTA GMBH

Core features backend java development. Member of selected, international agile team in charge of creation and maintenance of API/Endpoints, maintenance and upgrade of highly complex databases and filtering, management, mapping and processing of over 20 million individual company reports through some of the most important market researchers worldwide. GitKraken, Docker, MySQL, AWS, Jenkins, ElasticSearch and RabbitMQ are related technologies.

Junior Backend Team Lead and Project Manager

KUMO CONSULTORÍA S.L.

Backend Junior Development Team leader. Teaching the Kumo's software technologies to the Spanish Dual Studium employees and developing new features and improving legacy ones for the backend multi-threading environment. Meet with clients to gather requirements and project times. Reduced users bug reports on automated mailing, booking confirmations/cancellations and API connections by 80% after finding root causes. Using Apache Tomcat both for staging and production deployments and its further surveillance.

React.js Developer

PRIVATE NONPROFIT SIDE PROJECT

Nonprofit development of two webpages using React.js and Node.js and automatized deployment to github pages. Complete frontend development. The webpages were made for a hospitalized children association.

Student Fullstack / Backend Java Developer

KUMO CONSULTORÍA S.L.

Backend core development team. Maintenance of legacy code and development of new features in a multi-threaded environment, OracleSQL Database, Hibernate connections and Struts and Maven management. Improvement of SQL connection times and memory consumption, extension of legacy projects' database structures and development of highly complex SQL queries for specific side to side searches in a tourism-focused buy-and-sell rooming and cruiser system. JavaScript, Bootstrap and React.js or Angular were used for the frontend environment while on the backend side the focus was on Maven, Struts Hibernate, Spring JPA and OracleSQL Database.

GUEST INCOMING S.A. / EUROPLAYAS S.L.

B2B and B2C backend and frontend developments and maintenance of vacation packages and buy-and-sell hotel room system. Working directly with and for the clients as Kumo employee.

Professional Driver and Company Management

SELF-EMPLOYED / CO-FOUNDER OF PASGUT MULTISERVICIOS S.L.

Co-owner of a small delivery van and truck fleet company based in Mallorca. Management of teams of up to twelve drivers on the transportation sector. Deliveries of diplomatic bags, press, food and renting of drivers, vans and trucks as a service.

Languages and Technologies

Java, SQL, JavaScript, Python, TypeScript, C#

Hibernate, JPA, Spring, SpringBoot

Maven, Struts, Ant, Docker, Tomcat, Git, RabbitMQ

REST, XML, XSLT, JSON, SOAP, JSP

Bootstrap, React.js, Angular, Node.js, HTML, CSS

AWS, ElasticSearch, Jenkins
