English, Spanish, Catalan, Italian (A1), German (A2)

Volunteerings:

[AACF \(non-profit organization for hospitalized children\)](#)
[Spanish Disney's Legion 501st](#)

José Pascual

Java Backend Software Developer

Experience

Junior Backend Developer

STATISTA GMBH

Core features backend java development. Member of selected, international agile team in charge of creation and maintenance of API/Endpoints, maintenance and upgrade of highly complex databases and filtering, management, mapping and processing of over 20 million individual company reports through some of the most important market researchers worldwide. GitKraken, Docker, MySQL and RabbitMQ are related technologies.

Junior Backend Team Lead and Project Management

KUMO CONSULTORÍA S.L.

Backend Junior Development Team leader. Teaching the Kumo's software technologies to the Spanish Dual Studium employees and developing new features and improving legacy ones for the backend multi-threading environment. Meet with clients to gather requirements and project times. Reduced users bug reports on automated mailing, booking confirmations/cancellations and API connections by 80% after finding root causes. Using Apache Tomcat both for staging and production deployments and its further surveillance.

React.js Developer

PRIVATE NONPROFIT SIDE PROJECT

Nonprofit development of two webpages using React.js and Node.js and automatized deployment to github pages. Complete frontend development. The webpages were made for a hospitalized children association.

Student Fullstack / Backend Java Developer

KUMO CONSULTORÍA S.L.

Backend core development team. Maintenance of legacy code and development of new features in a multi-threaded environment, OracleSQL Database, Hibernate connections and Struts and Maven management. Improvement of SQL connection times and memory consumption, extension of legacy projects' database structures and development of highly complex SQL queries for specific side to side searches in a tourism-focused buy-and-sell rooming and cruiser system. JavaScript, Bootstrap and React.js or Angular were used for the frontend environment while on the backend side the focus was on Maven, Struts Hibernate, Spring JPA and OracleSQL Database.

Student Fullstack Developer

GUEST INCOMING S.A. / EUROPLAYAS S.L.

B2B and B2C backend and frontend developments and maintenance of vacation packages and buy-and-sell hotel room system.

Professional Driver and Company Management

SELF-EMPLOYED / CO-FOUNDER OF PASGUT MULTISERVICIOS S.L.

Co-owner of a small delivery van and truck fleet company based in Mallorca. Management of teams of up to twelve drivers on the transportation sector. Deliveries of diplomatic bags, press, food and renting of drivers, vans and trucks as a service.
