Software Developer

Fullstack and back-end software developer, experienced on Java tourism-focused SaaS applications. Highly motivated and always trying to acquire new knowledge. Basic ML and React.js experience through own personal projects.

Experience

Kumo Consulting, Mallorca   03.2019 – 07.2020
Junior Java Back-End Developer
- Junior developer in trainee, developing with our back-end team.
- In a fullstack-focused environment, I learned quickly to use Hibernate, Struts, to highly improve my SQL and multi-threading knowledges,. What helped me to get a real experience in the sector and absolve an unbeatable formation while supporting the senior team.
- Due to the Covid-19 current situation in Spain. Our Tourism focised company had to reduce the workforce to its minimum, being me one of the few who continued developing during quarantine.

Roger S.A., Mallorca   06.2012 - 03.2019
Coordinator, Professional Driver
- National and international delivery and messaging companies.
- Delivery of packages, press and diplomatic bags
- While managing different driver teams, vans and trucks gained experience on how to manage stress, teamwork and organization.

Studies

CS50 Introduction to AI with Python [h]   09.2020 - Now
Harvard University, edx online

Higher Technician in   09.2018 - 05.2020
