Software Developer

Fullstack and back-end software developer, experienced on Java tourism-focused SaaS applications. Highly motivated and always trying to acquire new knowledge. Basic ML and React.js experience through own personal projects.

Experience

Kumo Consulting, Palma (Mallorca)   03.2019 – 07.2020
Junior Java Back-End Developer
- Junior developer, developing with our back-end team.
- In a fullstack-focused environment, I learned quickly to use Hibernate, OracleDB, Tomcat, Struts and to highly improve my SQL, API, XML, JSON and multi-threading knowledges. That helped me to get a real experience in the sector and absolve an unbeatable formation while supporting the senior team.

Guest Incoming, Barcelona (remote)   12.2018 – 03.2019
Trainee Java and JavaScript Developer
- Java and JS developer assistant, helping a small core back-end developer team to prepare for the new tourism season.
- My first contact with OracleDB, Hibernate and Maven. I mostly made small bugfixing during this months and back-end's landings.

Europlayas, Llucmajor (Mallorca)   09.2018 – 12.2018
Trainee Developer
- Java, JavaScript (Bootstrap) developer trainee.
- As a trainee position, my duties were small bugfixing on the B2B platform's interface and small developments in JS and Java.

Roger S.A. (Self-Employed), Mallorca   06.2012 - 03.2019
Coordinator, Professional Driver
- National and international delivery and messaging companies.
- Delivery of packages, press and diplomatic bags
- While managing different driver teams, vans and trucks I gained experience on how to manage stress, teamwork and organization.
